ID	Title	Symbol	Ex.Rate	
<input type="checkbox"/> 1001	Euro	€	1.4053	   
<input type="checkbox"/> 1000	USD	\$ (Default)	1.0000	   

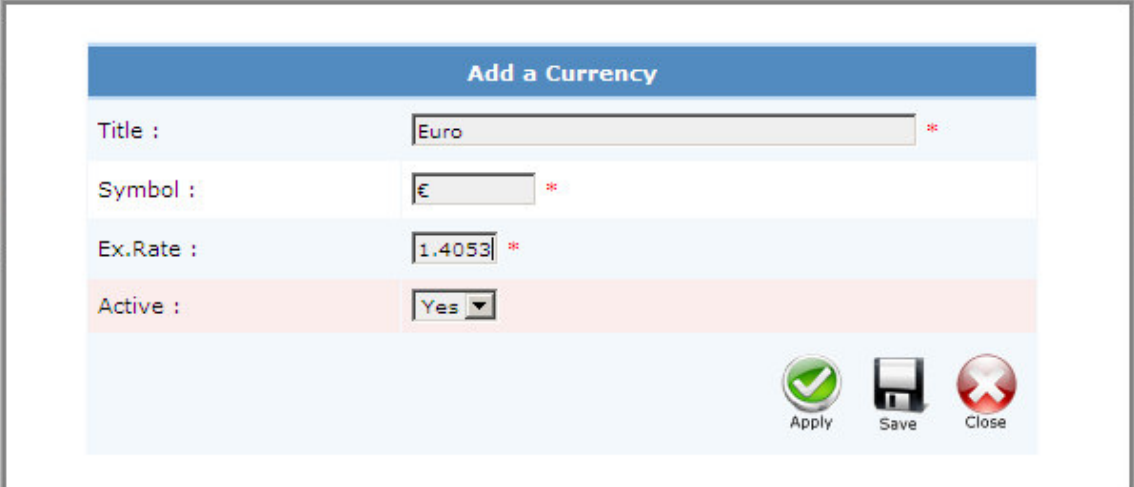

Page 1 of 1  
Total Record(s) : 2

You can have a currency title, symbol and an exchange rate.

There must have to be at least one currency in the system having the Symbol same as the constant SCRIPT\_DOLLAR in the file /include/site\_constants.php

Your default currency will be the one whose Symbol matches the SCRIPT\_DOLLAR constant. Also note that the default currency has an exchange rate = 1

### Adding or updating a Currency:

**Add a Currency**

Title : Euro \*

Symbol : € \*

Ex.Rate : 1.4053 \*

Active : Yes

Apply Save Close

You just have to provide the currency Title, Symbol, Ex.Rate and Status.

The exchange rate is used to calculate the product prices for different currencies.

If you do not want a currency to show up on the public area, you can just change the status of that currency to InActive.
