

Manage Unapproved Ads

This is the section where administrator can review all the payments going to publisher and can approve those payments (so that they are added to the publisher balance) or can reject and delete those payments.

This is a very important section. NO PUBLISHER is paid for the ads running on his website until his payment for that ad is approved here by the administrator. This is done to add check and balance and to curb the fraud.

This section allows you to approve publisher earnings:
